Provide a detailed explanation of this request including Rx sales history 13 week item movement current on hand count inventory adjustments etc: 52 week item movement reports were analyzed by DLPS and RXS and were found to be consistent with no spikes. Numerous scripts were audited. All were found to be legitimate with proper DOS, appropriate time between fills (monthly), minimal cash pay, majority third party. no multiple pharmacy use, single prescriber writing scripts. This medication is the doctor's group drug of choice for treating patients suffering from both acute and long term pain conditions. My DLPS and myself both agree nothing looks out of the ordering with respect to the dispensing of this medication from the staff at 10329.
